Your Learning Agenda ...

Diabetes in 2020: Understanding Evidence and Interventions Through Case Scenarios

Aims:

To help delegates appropriately assess patient clinical case scenarios and formulate action plans and interventions, including treatment options and communication strategies to move diabetes patients towards appropriate clinical targets.

What you should gain from the session:

- ▶ A greater awareness of the risk profile of Type 2 Diabetes
- ▶ An understanding of latest guidelines on therapeutic positioning and pathways
- ▶ An update on mechanisms of action and pro's and con's of individual treatments and their use in combination
- ▶ Potentially a greater awareness of appropriate target setting for a range of diabetes patients
- ▶ A range of risk/benefit communication strategies to support patient engagement.
- ▶ Awareness of and sign-posting to references and evidence sources to support your decision making.
