

What's New in Diabetes?

WEBINAR

Wednesday 14th October 2020

All Delegates will receive

- Increased knowledge in Diabetes
- A set of Course downloads
- A certificate for your appraisal portfolio

**Course Accredited for
2 hours CPD**

Introducing your speaker

Mr Paul Dromgoole RGN, RNMH, MSc Diabetes, PGCE

Clinical Lecturer - Diabetes / Diabetes Specialist Nurse

Paul Dromgoole is well known nationally for his diabetes educational work and his sessions are consistently very highly evaluated by attendees.

Meet the Speakers ...

Mr Paul Dromgoole RGN, RNMH, MSc Diabetes, PGCE

Paul has over 20 years' experience in diabetes management in Primary Care and Secondary Care Settings in Brighton, Leicester and York and more recently worked as a half-time Lecturer Practitioner in Diabetes at the University of York and an External Examiner for the University of Ulster.

He has extensive experience of supporting General Practice in clinical decision making and best practice in diabetes management and his teaching sessions and workshops are consistently highly evaluated for their clinical content, delivery and application to 'real-life' clinical practice.

Paul now combines a 2 day a week role as Clinical Nurse Specialist in Diabetes, with freelance Lecturing work throughout the UK. Outside of work he is a keen Scuba Diver and PADI Dive Instructor and now proud owner of a classic 1947 BSA Motorcycle!

Dr Iain Cranston MBBS, FRCP

Dr Iain Cranston is a diabetes physician based in Portsmouth, UK. He has specialty responsibility for the delivery of technology-driven services (CSII / CGM etc.) to approximately 1% of the UK population. Alongside this, he is the lead diabetes clinician for the Wessex renal and transplant centre, managing individuals with specific and high glycaemic risks. He is a National Committee member for the Diabetes Technology Network (DTN-UK).

He has a background in clinical research, obtained during his time at Guy's and King's College and St Thomas' Hospitals, into impaired awareness of hypoglycaemia in insulin-treated diabetes and the cerebral and endocrine mechanisms underlying the syndrome. For the last 20 years, Dr Cranston has been in practice with the goal of translating the lessons learnt from research into routine clinical care consultations. This has resulted in a focus on effective glucose monitoring strategies to underpin clinical decision-making and the development of data analytical processes to guide clinical consultations towards more effective therapeutic interventions in both type 1 and type 2 diabetes. He has published widely on this topic area (over 60 Peer-reviewed publications) and has been an invited speaker at Diabetes UK, EASD and many National meetings around the world

For the last 5 years, Dr Cranston has been a co-director in a collaborative educational project with Professor Roger Mazze (International Diabetes Center [IDC] Minnesota), at the AGP Clinical Academy, which has the central goal of educating healthcare professionals in the effective clinical interpretation of the ambulatory glucose profile derived from continuous glucose monitoring technologies

Your Learning Agenda ...

- ▶ Remote Diabetes Consultations as a result of Covid and Prioritising Patient 'Type'
- ▶ What's New in Diabetes: The Latest on Therapies, Guidelines and Clinical Trials
- ▶ Case Studies
- ▶ Open Forum for Questions
